

The farm knows more than the farmer is told.

An AI agriculture advisor that knows your farm, your crop, your weather — and tells you what to do and when, in your own language.

GROWTH · INTELLIGENCE · ACCESS

- THE PROBLEM

45 million farmers making life-and-death decisions on guesswork.

30–40%

of crops lost yearly
to preventable causes

< 5%

of farms reached by
extension services

0

live data sources
available to most farmers

- THE HUMAN COST

A disease spotted too late.

A field watered before the rain.

A crop sold at the wrong market.

For a smallholder family, each of these is not an inconvenience — it is a season's income riding on a guess.

The people with the least information have the most to lose.

- THE SOLUTION

One platform that turns daily crop questions into clear, timed answers.

ASK

AI Advisor routes each question to the right specialist

SEE

Photo disease detection, live prices & weather

KNOW

Farm records, growth stages & profit tracking per field

GROW

Crop recommendations & schemes you qualify for

- WHAT WE'VE BUILT

A working suite of eight tools on one dashboard.

AI Advisor

6 specialist agents · streaming chat

Disease Detect

photo scan → diagnosis → treatment

Pest Prediction

7-day outbreak risk per farm & crop

Mandi Prices

6 gov sources · 14-day forecast

Weather

hyperlocal forecast · daily advisory

Farm Records

map fields · log every activity

Profit & Loss

budget · ROI · break-even tracking

Crop Planner

soil + season + market scored picks

8 languages · 268 tests · full-stack Next.js · offline PWA

Not a chatbot. A triage team of specialist agents.

A triage orchestrator understands your question and routes it to the right specialist — each with live tool access to your farm records, weather, market prices, and a knowledge base.

Streaming responses · conversation memory · persisted history

Crop advisor

field & crop science

Weather agent

live forecast + advice

Farm-data agent

your records & history

Prices agent

markets & projections

Schemes agent

subsidies you qualify

Handoff

human escalation 06

A photo of a leaf. A diagnosis in seconds.

Upload a photo of a diseased leaf — the model classifies it across 38+ crop diseases and returns a diagnosis, confidence score, and clear treatment plan.

SCAN → DIAGNOSE → TREAT

- 1 Upload the affected leaf
- 2 Classified across 38+ diseases
- 3 Confidence score + diagnosis
- 4 Treatment advice, then ask more

Predict the outbreak before it arrives.

Incidence-driven risk scoring per farm and crop — powered by scraped district data, weather factors, and growth stage analysis.

7-day forecast

risk score per day with trend chart

Per-farm scoring

weather + growth stage + incidence data

Alert system

mark read / dismiss with notifications

Treatment costs

PKR-priced spray & pesticide advice

Real data under real decisions.

Mandi Prices

Live prices from 6 official Pakistani sources with a 14-day statistical forecast and sell / hold signals.

Holt-Winters forecast · price alerts · transport cost cost

Weather Advisory

Hyperlocal forecast woven with your crop and growth stage — one clear advisory: when to irrigate, spray, or protect.

OpenWeather · stage-aware rules · daily advisory

Advice is only as good as the farm it's grounded in.

Farm Records

Every field on a map,
every activity logged.

Profit & Loss

Budget, spend, ROI
and break-even per crop.

Crop Planner

Soil, season & market
demand scored picks.

- THE TECHNOLOGY

Software-only, API-driven, built to run and to scale.

Next.js 16

full-stack, no separate backend

Neon Postgres

Lakebase database, migrations in-repo

@openai/agents

triaging multi-agent advisor

Hugging Face

plant-disease vision model

OpenWeather

hyperlocal forecast feeds

6 gov APIs

live mandi price ingestion

pgvector

knowledge-base semantic search

Cloudinary

scan image storage

- **FEASIBILITY — WHAT WE'VE SHIPPED**

Fully working today.

SHIPPED & TESTED

- ✓ Full auth — signup, OTP, login, reset
- ✓ AI advisor · 6 agents · streaming · RAG
- ✓ Crop disease detection + treatment
- ✓ Pest outbreak prediction · 7-day forecast
- ✓ Mandi prices · 6 sources · forecast · alerts
- ✓ Weather advisory · stage-aware · daily
- ✓ Farms, records, P&L, crop planner
- ✓ 8 languages with RTL · 268 automated tests

NEXT

- Mobile polish
- Full non-English
- Broader schemes
- Scale price sources

From memory to margin.

When a farmer knows before they act, the pattern of loss stops repeating.

20–40%

crops lost to preventable
causes

30–40%

water wasted irrigating
before rain

15–25%

more by selling at the
right time

8

languages, one local
advisor

Built for Pakistan. Ready for the world.

An agriculture that respects tradition and scales with technology — advice in every farmer's own language, on the phone already in their hand.
